OUR CULTURE

The Ward culture begins and ends with our attention to employee engagement, safety, ergonomics and continuous training.

Without a safe working environment, we jeopardize our individual health, company well-being, our clients' property and, most of all, our families.

Anyone can stop work on a Ward project any time they feel there is a potential safety issue. Ward's safety officers and auditors will promptly move to evaluate the situation and, if necessary, prescribe a new approach to mitigate the risk and get everyone working as safe as possible.

"Our project planning and execution is second to none. We set a very high bar for our Field Services Group and they work diligently to exceed those expectations.

They anticipate the unexpected and create contingency plans on every project to ensure our customers' facilities get back online on time or ahead of schedule, keeping their businesses profitable."

- Jon Ward
President
